ABSTRACT

**Keyword:** Relative clause, the relative pronoun, types, functions, *Jakarta Post*

One item of grammar in English is a relative clause. In order to help students analyze the relative clause, the research analyzes the types of relative clauses, and functions of relative pronouns in the city and national article in the *Jakarta Post*. This research aims to answer two formulation of the problem, namely: (1) what are type of relative clause in sentences in city and national article in the Jakarta Post, (2) what is the function of relative pronouns in relative clause in sentences in city and national article in the *Jakarta Post*. To get answers from problem formulas, this research uses the theory of Thomson and Martinet to answer types relative clause and functions of relative pronouns. This research uses qualitative research methods. The data are taken from *Jakarta Post* articles. Then grouped by type and function. From the analysis, it is found that 36 relative clauses taken from the 23 articles consist of two types of relative clause and 3 function relative pronoun. Two types of relative clauses consist of 11 data of defining relative clauses and 23 non defining relative clause data. 3 function of relative pronoun consist of 17 data function as subjects, 1 data functions as object and 2 data function as possessive. This analysis concludes that the articles that have been analyze, mostly use non-defining relative clause types and function as objects.
