DAFTAR ISI

ABSTRAK .............................................................................................................. ii
KATA PENGANTAR ............................................................................................ iv
DAFTAR ISI ......................................................................................................... v
DAFTAR TABEL .................................................................................................... vi
DAFTAR GAMBAR ............................................................................................... vii
DAFTAR LAMPIRAN ............................................................................................ viii

BAB I. PENDAHULUAN
  1.1 Latar Belakang Masalah ............................................................................... 1
  1.2 Rumusan Masalah ........................................................................................ 5
  1.3 Tujuan Penelitian ........................................................................................ 5
  1.4 Manfaat Penelitian .................................................................................... 5
  1.5 Kerangka Penelitian .................................................................................. 6
  1.6 Hipotesis ..................................................................................................... 7

BAB II. TINJAUAN PUSTAKA
  2.1 Mikrohabitat Dan Relung .......................................................................... 8
  2.2 Serangga Hama ............................................................................................ 9
  2.3 Kutu Anjing (Phyllotreta vittata F) ............................................................. 13
      2.3.1 Morfologi ............................................................................................... 13
      2.3.2 Siklus Hidup ........................................................................................ 14
      2.3.3 Penanggulangan .................................................................................. 15
  2.4 Insektisida .................................................................................................. 15
  2.5 Tanaman Sawi Hijau (Brassica Juncea L) .................................................... 17
      2.5.1 Morfologi ............................................................................................... 17
      2.5.2 Tinjauan Umum .................................................................................... 18
      2.5.3 Pertumbuhan Tanaman Sawi Hijau ..................................................... 19

BAB III. METODE PENELITIAN
  3.1 Lokasi Dan Waktu Penelitian .................................................................... 21
  3.2 Metode ......................................................................................................... 21
      3.2.1 Teknik Penarikan Sampel ..................................................................... 21
      3.2.2 Variabel Penelitian ............................................................................ 22
      3.2.3 Alat Dan Bahan ................................................................................... 23
      3.2.4 Langkah Penelitian ............................................................................ 23

BAB IV. HASIL DAN PEMBAHASAN
  4.1 Populasi Kutu Anjing (Phyllotreta vittata F) Pada Areal Tanaman Sawi Hijau ................................................................. 25
  4.2 Keberadaan Kutu Anjing (Phyllotreta vittata F) Pada Areal Tanaman Sawi Hijau ................................................................. 32

BAB V. PENUTUP
  5.1 Kesimpulan .................................................................................................. 45
  5.2 Saran ............................................................................................................. 46
DAFTAR PUSTAKA ........................................................................................................... 47
LAMPIRAN ......................................................................................................................... 49
