KATA PENGANTAR ........................................................................................................ i

DAFTAR ISI .................................................................................................................. iii

DAFTAR TABEL ........................................................................................................... v

DAFTAR GAMBAR ....................................................................................................... vi

DAFTAR LAMPIRAN ..................................................................................................... viii

BAB I PENDAHULUAN

A. Latar Belakang ........................................................................................................... 1

B. Rumusan Masalah ................................................................................................. 4

C. Tujuan Penelitian .................................................................................................. 5

D. Manfaat Hasil Penelitian .................................................................................... 5

E. Definisi Operasional ............................................................................................ 5

F. Kerangka Pemikiran ............................................................................................ 6

G. Hasil-Hasil Penelitian Yang Relevan .................................................................. 9

BAB II KAJIAN PUSTAKA

A. Lembar Kerja ......................................................................................................... 11

B. Antosianin ............................................................................................................. 13

C. Tanaman Berwarna .............................................................................................. 17

D. Kromatografi Kertas ........................................................................................... 23
E. Spektrofotometer UV-Vis................................................................. 24

BAB III METODOLOGI PENELITIAN
A. Desain/Metode Penelitian................................................................. 26
B. Sumber Data Penelitian ................................................................. 26
C. Tempat Dan Waktu Penelitian.......................................................... 26
D. Prosedur Penelitian........................................................................... 27
E. Instrumen Penelitian.......................................................................... 33
F. Teknik Pengumpulan Data Penelitian ................................................. 35
G. Teknik Analisis Data Penelitian......................................................... 36

BAB IV HASIL PENELITIAN DAN PEMBAHASAN
A. Hasil Penelitian.................................................................................. 39
B. Pembahasan.......................................................................................... 58

BAB VI PENUTUP
A. Simpulan............................................................................................. 66
B. Saran..................................................................................................... 67
