HALAMAN PENGESAHAN ................................................................................................................ iii
LEMBAR PERNYATAAN ................................................................................................................ iv
ABSTRAK ........................................................................................................................................... v
ABSTRACT ........................................................................................................................................... vi
RIWAYAT HIDUP ............................................................................................................................. vii
KATA PENGANTAR ............................................................................................................................ viii
DAFTAR ISI .......................................................................................................................................... x
DAFTAR TABEL ..................................................................................................................................... xiii
DAFTAR GAMBAR ............................................................................................................................. xiv
DAFTAR LAMPIRAN ............................................................................................................................ xv
BAB I PENDAHULUAN ....................................................................................................................... 1
   1.1 Latar Belakang ............................................................................................................................... 1
   1.2 Rumusan Masalah .......................................................................................................................... 3
   1.3 Tujuan Penelitian .......................................................................................................................... 3
   1.4 Kegunaan Penelitian ..................................................................................................................... 4
   1.5 Kerangka Pemikiran ...................................................................................................................... 4
   1.6 Hipotesis .......................................................................................................................................... 8
BAB II TINJAUAN PUSTAKA ............................................................................................................. 10
   2.1 Tanaman Buncis (Paseolus vulgaris L.) ....................................................................................... 10
   2.2 Pupuk Urea atau CO(NH_2)_2 .................................................................................................... 13
   2.3 Pupuk Guano Kelelawar ............................................................................................................. 16
   2.4 Kombinasi Pupuk Guano Kelelawar dengan Urea ................................................................. 18
BAB III METODOLOGI ..................................................................................................................... 21
   3.1 Tempat dan Waktu Penelitian ..................................................................................................... 21
   3.2 Bahan dan Alat ............................................................................................................................. 21
       3.2.1 Bahan ..................................................................................................................................... 21
       3.2.2 Alat ....................................................................................................................................... 21

x
3.3 Metode Penelitian ................................................................. 22
  3.3.1 Rancangan Percobaan ................................................... 22
  3.3.2 Rancangan Perlakuan ................................................... 22
  3.3.3 Rancangan Respon Penunjang .................................... 23
  3.3.4 Rancangan Respons Utama ......................................... 23

3.4 Rancangan Analisis .............................................................. 26

3.5 Pelaksanaan Penelitian .......................................................... 28
  3.5.1 Persiapan Media Tanam ............................................. 28
  3.5.2 Penanaman ................................................................. 28
  3.5.3 Pemberian pupuk urea .............................................. 28
  3.5.4 Pengajiran ................................................................. 28
  3.5.5 Pemeliharaan ............................................................. 29
  3.5.6 Pemanenan ................................................................. 29

BAB IV HASIL DAN PEMBAHASAN ........................................... 30

4.1 Pengamatan Penunjang .......................................................... 30
  4.1.1 Analisis Tanah Awal ................................................... 30
  4.1.2 Analisis Pupuk Guano Kelelawar ................................. 31
  4.1.3 Analisis Suhu Udara Harian dan Kelembaban Udara Harian ... 34
  4.1.4 Hama dan Penyakit .................................................... 35

4.2 Pengamatan Utama ................................................................. 38
  4.2.1 Tinggi Tanaman (cm) .................................................. 38
  4.2.2 Jumlah Klorofil (unit spad) ....................................... 41
  4.2.3 Nisbah Pupus Akar (g) ............................................. 44
  4.2.4 Awal Muncul Bunga (HST) ....................................... 46
  4.2.4 Jumlah Bunga (kuntum) .......................................... 48
  4.2.5 Persentase Bunga jadi Polong (%) .............................. 51
  4.2.6 Jumlah Polong per Tanaman (polong) ......................... 53
  4.2.7 Bobot Segar Polong per Tanaman (g) ......................... 55
  4.2.8 Bobot Kering Polong (g) .......................................... 57
  4.2.9 Bobot Kering Brangkas (g) ....................................... 59
4.2.10 Indeks Panen.................................................................62

BAB V SIMPULAN DAN SARAN........................................64
5.1 Simpulan ...............................................................64
5.2 Saran...............................................................64
