DAFTAR ISI

ABSTRAK .......................................................................................................................... i
ABSTRACT .......................................................................................................................... ii
KATA PENGANTAR ............................................................................................................ iii
DAFTAR ISI ....................................................................................................................... v
DAFTAR GAMBAR ............................................................................................................. vii
DAFTAR TABEL ............................................................................................................... viii
DAFTAR ISTILAH ............................................................................................................... ix
DAFTAR SINGKATAN DAN LAMBANG ........................................................................... x
BAB I PENDAHULUAN ............................................................................................... 1
  1.1 Latar Belakang ........................................................................................................... 1
  1.2 Rumusan Masalah .................................................................................................... 3
  1.3 Batasan Masalah ...................................................................................................... 4
  1.4 Tujuan Penelitian .................................................................................................... 4
  1.5 Manfaat Penelitian .................................................................................................. 4
BAB II TINJAUAN PUSTAKA ....................................................................................... 5
  2.1 Tanah Liat .................................................................................................................. 5
  2.2 Pasir ........................................................................................................................... 7
  2.3 Sekam Padi ............................................................................................................... 8
  2.4 Tembaga sebagai Penurunan Nilai BOD Air ............................................................ 10
  2.5 Filter Keramik .......................................................................................................... 11
  2.6 Spektroskopi Serapan Atom (SSA) .......................................................................... 13
  2.7 Scanning Electron Microscopy (SEM) .................................................................... 14
  2.8 Difraksi Sinar-X (XRD) ............................................................................................ 15
BAB III METODE PENELITIAN ................................................................................. 16
  3.1 Waktu dan Tempat Penelitian ................................................................................ 16
  3.2 Bahan, Alat, dan Instrumentasi .............................................................................. 16
  3.3 Prosedur .................................................................................................................... 16
    3.3.1 Preparasi dan Pembuatan Membran Keramik .................................................. 18
      3.3.1.1 Preparasi bahan .......................................................................................... 18
      3.3.1.2 Pembuatan membran keramik .................................................................... 18
    3.3.2 Pengaktifan Pori-pori dan Uji Laju Perembesan Membran Keramik ......... 18
      3.3.2.1 Pengaktifan pori-pori membran keramik .................................................. 18
3.3.2.2 Pengujian laju perembesan air ......................................................... 19
3.3.3 Pembuatan Larutan Standar AAS .......................................................... 19
3.3.3.1 Pembuatan larutan standar MnSO₄·H₂O ............................................. 19
3.3.3.2 Pembuatan larutan standar Pb(NO₃)₂ ............................................... 19
3.3.3.3 Pembuatan larutan standar Hg(NO₃)₂ .............................................. 19
3.3.4 Karakterisasi Membran Keramik .......................................................... 20
3.3.4.1 Karakterisasi morfologi membran keramik ...................................... 20
3.3.4.2 Karaterisasi struktur kristal .............................................................. 20
3.3.5 Impregnasi Tembaga dan Pengujian BOD Air ...................................... 20
3.3.4.1 Impregnasi tembaga pada membran keramik ................................... 20
3.3.4.2 Pengujian BOD air ........................................................................ 21
BAB IV HASIL PENELITIAN DAN PEMBAHASAN ..................................... 22
4.1 Preparasi Membran Keramik ..................................................................... 22
4.2 Pembuatan Membran Keramik .................................................................. 23
4.3 Pengaktifan pori-pori membran keramik ................................................ 25
4.4 Pengujian Laju Perembeasan air .............................................................. 28
4.5 Analisis air hasil filter keramik menggunakan AAS ................................. 30
4.6 Karakterisasi SEM .................................................................................. 33
4.7 Karakterisasi XRD .................................................................................. 35
4.8 Impregnasi Tembaga dan Hasil BOD Air ................................................ 38
BAB V KESIMPULAN DAN SARAN .......................................................... 42
5.1 Kesimpulan .............................................................................................. 42
5.2 Saran ........................................................................................................ 42
DAFTAR PUSTAKA ......................................................................................... 43
SUBJEK INDEKS ............................................................................................. 47
LAMPIRAN A ................................................................................................ 48
LAMPIRAN B ................................................................................................ 50
LAMPIRAN C ................................................................................................ 54
