The existence of human beings cannot be separated from communication and interaction with other people. Because they are social creatures that cannot live alone in this world to face their life. So, communication and interaction is part of life from human.

Language is tool to make communication with another. According to (Finocchiaro in Alwasilah) said, "Language is a system of arbitrary vocal symbols which permits all people in a given culture, or other people who have learned the system of that culture to communicate or to interact".

There are two forms of language those are spoken and written. Spoken language involved sounds that produced by our oral system and while written language is language in the form of text. Both, spoken and written language are used for communication and exchange information between speakers and listeners.

Wardhaugh (1972: 3-8) stated, “The function of language is human’s tool for communication whether in the form of spoken or written”. In daily life, people use almost any language activities, using spoken language, written language.

Motto is one of the written forms of language, because the concepts are contained in there, a complete thought or idea that comes from the subject(user or writer). Motto is a text that reflects an organization, institution or individual as the principle of life, motto is short sentence that expresses the aims and beliefs of a person, a group, etc and used as a rule of behavior (*Oxford Learner’s Pocket Dictionary*)\(^3\).

Some people said motto of course is no stranger. Motto usually people get on working form, join the form of an organization, curriculum vitae (CV), summary, or someone can get it in the paper at every university graduating paper. Even corporate institutions that is not uncommon to have one each motto.

Motto is not just the text that contains a series of words into a sentence or phrase, but reversed the text talks indirectly about the meaning contained in the text. The text even as the transmitter of the message, Kaelan said that "Human life in his communication with other make up in a community to convey the message, expression, feeling, and emotion”\(^4\). It means, the human is able to express their will and desire. Even, they can to work, to play together, and to do anything they want.
