LEMBAR PENGESAHAN .......................................................................................................iii
LEMBAR PERSEMBAHAN ......................................................................................................iv
ABSTRAK ..............................................................................................................................v
ABSTRACT ..............................................................................................................................vi
KATA PENGANTAR ...............................................................................................................vii
DAFTAR ISI .................................................................................................................................ix
DAFTAR GAMBAR ....................................................................................................................xi
DAFTAR TABEL ..........................................................................................................................xii
BAB I PENDAHULUAN
  1.1 Latar Belakang ....................................................................................................................1
  1.2 Rumusan Masalah ..............................................................................................................3
  1.3 Tujuan Penelitian ...............................................................................................................4
  1.4 Ruang Lingkup Penelitian ...................................................................................................4
  1.5 Sistemaka Penulisan .........................................................................................................4
BAB II TINJAUAN PUSTAKA
  2.1 Baja Oxide Dispersion Strengthened ..............................................................................6
      2.1.1 Pengertian Baja ......................................................................................................6
      2.1.2 Unsur paduan baja ...............................................................................................6
      2.1.3 Diagram Fasa Fe-Cr .............................................................................................7
  2.2 Baja Oxide Dispersion Strengthened ..............................................................................8
      2.2.1 Sintesis Baja Oxide Dispersion Strengthened ......................................................9
      2.2.2 Pemaduan Mekanik ............................................................................................10
      2.2.3 Komponen Pemaduan Mekanik .........................................................................11
      2.2.4 Mekanisme Perpaduan mekanik .........................................................................11
  2.3 Interaksi Neutron dengan Bahan .....................................................................................12
      2.3.1 Difraksi Neutron ..................................................................................................13
      2.3.2 High Resolution Powder Difractometer (HRPD) ................................................14
BAB III METODOLOGI PENELITIAN
3.1 Waktu dan Tempat Pelaksanaan Penelitian ............................................. 17
3.2 Garis Besar Pelaksanaan Eksperimen ......................................................... 17
3.3 Rancangan Penelitian .................................................................................. 18
3.4 Alat dan Bahan Penelitian ........................................................................... 19
  3.4.1 Alat Penelitian ....................................................................................... 19
  3.4.2 Bahan Penelitian ................................................................................... 19
3.5 Tata Kerja Penelitian .................................................................................. 20
  3.5.1 Preparasi Sample .................................................................................. 20
  3.5.2 Proses Milling ....................................................................................... 20
  3.5.3 Pengeringan Bahan .............................................................................. 20
  3.5.4 Sintering ............................................................................................... 20
  3.5.5 Karakterisasi ......................................................................................... 21

BAB IV HASIL DAN PEMBAHASAN

4.1 Hasil Uji Struktur Mikro ............................................................................ 25
  4.1.1 Serbuk .................................................................................................. 25
  4.1.2 Pelet ...................................................................................................... 29

4.2 Hasil Uji Struktur Kristal ........................................................................... 40
  4.2.1 Serbuk .................................................................................................. 40
  4.2.2 Pelet ...................................................................................................... 46

BAB V PENUTUP

5.1 Kesimpulan .................................................................................................. 52
5.2 Saran ............................................................................................................ 52
