COVER ........................................................................................................... i
SURAT PERNYATAAN KEASLIAN SKRIPSI .............................................. ii
LEMBAR PERSETUJUAN ........................................................................... iii
LEMBAR PENGESAHAN ........................................................................... iv
LEMBAR PERSEMMBAHAN ........................................................................ v
KATA PENGANTAR .................................................................................. vi
ABSTRAK .................................................................................................... viii
ABSTRACT ................................................................................................. ix
DAFTAR ISI ................................................................................................... x
DAFTAR GAMBAR ..................................................................................... xii
DAFTAR TABEL ........................................................................................... xiv
BAB I ............................................................................................................. 1
PENDAHULUAN ........................................................................................... 1
1.1. Latar Belakang .................................................................................... 1
1.2. Keragka dan Ruang Lingkup ............................................................. 2
1.3. Rumusan Masalah ............................................................................. 2
1.4. Tujuan Penelitian ............................................................................. 3
1.5. Metode Pengumpulan Data .............................................................. 3
1.6. Sistematika Penulisan ...................................................................... 4
BAB II ........................................................................................................... 5
LANDASAN TEORI ...................................................................................... 5
2.1. Dynamic Light Scattering (DLS) ...................................................... 5
2.2. Autocorrelation Function (ACF) ..................................................... 8
2.3. Titanium Dioxide (TiO₂) ................................................................. 9
2.4. Pengukuran Citra ............................................................................ 11
2.5. Scanning Electron Microscopy (SEM) ............................................. 11
2.6. Perkembangan Ilmu ....................................................................... 13
BAB III ........................................................................................................ 15
METODOLOGI PENELITIAN ................................................................. 15
3.1. Waktu dan Tempat Pelaksanaan Penelitian .................................... 15
3.2. Alat dan Bahan Penelitian ................................................................. 15  
3.3. Garis Besar Pelaksanaan Eksperimen ........................................... 16  
3.4. Tahap Preparasi Suspensi TiO₂ ....................................................... 16  
3.5. Tahap Pengukuran atau perekaman ............................................... 17  
3.6. Tahap RGB Analysis ................................................................. 18  
3.7. Tahap Penggunaan Microsoft Excel ............................................. 19  

BAB IV ......................................................................................................... 21  
HASIL DAN PEMBAHASAN ..................................................................... 21  
4.1. Karakterisasi SEM dan DLS Komersil ............................................ 21  
4.2. Dynamic Light Scattering Variasi Sudut ........................................ 23  
4.3. Dynamic Light Scattering Variasi Radius ...................................... 26  
4.4. Dynamic Light Scattering Variasi Konsentrasi ................................. 29  

BAB V ......................................................................................................... 33  
PENUTUP ..................................................................................................... 33  
5.5. Kesimpulan ..................................................................................... 33  
5.6. Saran ............................................................................................... 33
