Pemikiran Baudrillard mengenai konsumerisme diawali oleh kritiknya pada teori Marx dan para marxian tradisional. Dia memandang bahwa masyarakat di masa kapitalisme lanjut bukan lagi dihadapkan pada mode produksi, melainkan mode konsumsi.

ABSTRACT

Raihan Fikri (2024) : The Impact of Coffee Shop Development on the Lifestyle of Adolescents (Study on Coffee Shop Z'dulur Jalan Cisinga, Tasikmalaya Regency).

The development of coffee shops in Tasikmalaya Regency reflects contemporary social transformation, where coffee rooms are no longer just a place to enjoy drinks, but a social arena that represents the lifestyle and identity of teenagers in the digital era.

This study aims to analyze the impact of the development of *Coffee shops* on the lifestyle of teenagers in Tasikmalaya Regency, especially at *the Z' Dultur Coffee shop* located on Cisinga Street. The rapid growth of *coffee shops*, driven by advances in digital technology and social media trends, has changed the way teens gather and interact.

This study uses Jean Baudrillard's theory of consumptive society which explains that the situation of modern society is determined by reality that is clearly surrounded by consumption factors and characterized by simulated objects on goods or services. Baudrillard's thinking on consumerism began with his critique of Marxist theory and traditional Marxists. He views that society in the period of advanced capitalism is no longer faced with a mode of production, but a mode of consumption.

The method used in this study is qualitative with a descriptive approach, which involves observation and direct interviews with *coffee shop* visitors. The data analysis techniques used include data reduction, data presentation, and conclusion drawn.

The results of research that have been conducted by researchers at *Coffee shop Z' Dultur* on the analysis of the development of *coffee shops* on the lifestyle of teenagers in Tasikmalaya show that *coffee shops* not only function as a place to enjoy coffee, but also as a social space that provides *prestige* and identity for teenagers. The study found that teens' lifestyles have changed, with *coffee shops* becoming an integral part of their social activities.
