

ABSTRACT

STRATEGY FOR PUBLIC STREET LIGHTING BUDGET PLANNING IN THE DISTRICT OF BANDUNG

This research is motivated by the lack of public street lighting in the Bandung Regency area. The problem faced is the lack of lighting on the road, especially there are still many lights that do not turn on which can be interpreted as the same as the same as no lights. The purpose of this study was to find out how the budget design strategy in the construction of public street lighting in Bandung Regency. The method used is descriptive qualitative method. Data collection techniques used in this study are interviews, observation and documentation studies. The incoming analysis carried out by the researcher is the data analysis carried out by examining all data, classifying all data, as well as inductively pulling from specific to general matters. Based on the results of this study, the strategy that was carried out did not work well, therefore it was said that it was not optimal. The reason it is said not to be because there is no specific strategy in budget planning related to the construction of public street lighting. In addition, the role of the community is still lacking due to the lack of knowledge related to complaints that should be socialized by the DPUTR for Public Road Information.
