The purpose of this study is to clarify the rules regarding auctions and straighten the laws and regulations related to mortgage rights and the process of transferring ownership rights in auctions as well as to provide an overview of the legal process taken for legal subjects who have good intentions.

This research is based on several theories, namely the rule of law theory as a basic reference in research. Auction theory is a means of knowing problems and providing an overview of the issue of cancellation of property rights in the auction process. The theory of unlawful acts becomes signs in applying the rules related to auctions and mortgages.

This research was conducted using a descriptive analysis method, namely researching, describing and providing a detailed description of the auction cancellation lawsuit based on an unlawful act which was then analyzed and analyzed systematically and then a conclusion was drawn.

The results show that there is an overlap of rules related to auctions, namely the provisions of Article 3 of the Regulation of the Minister of Agrarian Affairs and Spatial Planning / National Land Agency - PMATR/BPN No. 13 of 2017 concerning Procedures for Blocking and Confiscation with other laws, namely Law number 4 1996 concerning Mortgage Rights in article 6 which causes obstruction of the change of ownership rights related to auctions conducted by creditors against debtors.
