Dear Editor TEC EMPRESARIAL

I have read and used scientific articles published in TEC EMPRESARIAL.

The performance of the TEC EMPRESARIAL was excellent, and the published article helped to conduct research and write scientific reports.

I am Iwan Setiawan. Lecturer from UIN Sunan Gunung Djati, Bandung

I have completed a scientific article entitled "***Transforming Musyarakah Mutanasiqah Contract: An Analysis of Refinancing Products in Islamic Financial Institutions.***"

I hope this article can be published in the TEC EMPRESARIAL because exciting findings in the scientific report can become new treasures in science, especially in accountant sciences.

We are willing to go through the review process following TEC EMPRESARIAL standards.

Best Regards,

Iwan Setiawan

Editor and Reviewer comments:

Reviewer #1:

1. This paper has some interesting information, and the topic is quite important; however, it seems that there are some basic points that indicate deficiencies in data collection (questionnaires), thus making the conclusions questionable..
2. The English in parts approaches is incomprehensible, so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The literature review refers to engaging experience and studies elsewhere, but it is not well linked to the research and, therefore, the conclusions.
4. The paper's focus is more applicable to Indonesia Only. How about other countries and the questionnaire?
5. There should be more information about the object of research, not about the content of the study.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Iwan Setiawan

UIN Sunan Gunung Djati, Bandung

Thank you for your efforts to improve your article.

Based on the Reviewers' considerations, the article has, at some point, increased. However, you have to improve on a few more points. Hopefully, you willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. I was hopeful that this article would be readily usable though the English in parts is so low that reading is challenging. The topic is of great importance.
2. The literature review includes some tantalizing references, but the links are not made to the specific study even after sorting through the language issues.
3. When study design comes into play, there are serious questions about the system.
4. It might be publishable if the Author could work with a robust English language editor or colleague to clean up both language and argument.
5. A side note is that it's not clear what title references the article.

Articles that have been revised and please send them back via this email.
