04 Januari 2023 10.20

Dear: Editor ECB

I am Moh. Dulkiah, lecturer at UIN Sunan Gunung Djati Bandung, Indonesia

We have an interest in the field of science published by European Chemical Bulletin (ECB), and now we have research that is in line with the "focus and scope" of this journal.

We have completed a scientific article entitled "**The Role of Social Capital in Driving Achievement of Student Groups in Higher Education**".

We hope this article can be published in the ECB, because there are interesting findings in the scientific article that can become new treasures in science.

Best Regards,  
Thanks

Moh. Dulkiah  
UIN Sunan Gunung Djati Bandung, Indonesia

05 Januari 2023 10.10

Dear  
Mr. Moh. Dulkiah  
UIN Sunan Gunung Djati Bandung, Indonesia

Thank you for submitting the manuscript, "**The Role of Social Capital in Driving Achievement of Student Groups in Higher Education**" to European Chemical Bulletin (ECB).

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Always check your email, because we will only notify you via this official email.

Best Regards,

11 Februari 2023 11.21

Dear  
Mr. Moh. Dulkiah  
UIN Sunan Gunung Djati Bandung, Indonesia

The European Chemical Bulletin (ECB) Editorial Board has reviewed your article, the research topic is very interesting, but we decided that your article could not be accepted immediately. You must improve your article on several points.

I am sure you are willing to make this improvement because your scientific articles must meet ECB standards.

Please correct your article according to the instructions from the ECB reviewers.

Reviewer 1:

Overall, this article provides valuable insights into the importance of social capital in driving the academic achievement of student groups in higher education. The literature review is well-structured and comprehensive, and the research methodology is sound. However, I have some concerns about the generalizability of the findings, as the study is limited to a specific university in a particular geographic location. Additionally, I suggest the authors include a more detailed discussion of the implications of their findings for higher education policy and practice.

Reviewer 2:

This article makes a significant contribution to the literature on social capital and academic achievement in higher education. The authors' use of multiple regression analysis to examine the relationships between social capital, academic performance, and demographic factors is appropriate and robust. However, I recommend that the authors provide a more detailed description of their sampling strategy and data collection methods to ensure transparency and replicability. Additionally, I suggest that the authors include a discussion of potential limitations and future research directions.

I hope you can make improvements as soon as possible, and send the revised article again via this email.

Best Regards,

13 April 2023 09.21

Dear

Mr. Moh. Dulkiah  
UIN Sunan Gunung Djati Bandung, Indonesia

Based on Reviewers' considerations, the article has, at some point, increased. However, you have to improve on a few more points. Please follow the following revision instructions:

Reviewer 1:

The article "The Role of Social Capital in Driving Achievement of Student Groups in Higher Education" provides an interesting perspective on the importance of social capital in the success of student groups in higher education. The literature review is thorough and the methodology is clearly explained. However, I would like to see more discussion on the limitations of the study and potential areas for future research. Additionally, the conclusion could be strengthened by providing more specific recommendations for educators and policymakers.

Reviewer 2:

I found "The Role of Social Capital in Driving Achievement of Student Groups in Higher Education" to be a well-written and informative article. The author's use of case studies to illustrate their points was effective, and the analysis of the data was thorough. However, I do have some concerns regarding the sample size and the generalizability of the results. It would be useful to see how the findings of this study compare to similar studies conducted in different settings. Overall, I believe this article makes a valuable contribution to the field of higher education research.

Articles that have been revised and please send it back via this email.

Best Regards,
